DUET STEM
TO A BETTER FUTURE

STEM

Science, Astronomy, Coding, AI & Robotics Lab Program

A complete one stop solution for learning, innovation, creativity, coding, astronomy, AI/ML, & robotics for 21st century skills.

Know More

Aligned with CBSE/ICSE & State Boards and NEP 2020

One-Stop IT, AI & Robotics Program

Our Information Technology, Coding, AI/ML & Robotics Program makes skill based, engaging and interactive learning possible for schools and educational institution. Through interactive, industry-standard DIY projects, we help students as young as 6 master complex concepts by actually building them. Make your school a hub of innovation where skill-based learning meets real-world application.

- Structured & Engaging Digital and Physical Content
- Coding, AI & Robotics with Skill Based Hands-on learning
- Teachers & Students Skill Development Program
- Learning, Assessment and Certification Platforms
- Online Interactive Resources & Support

21st Century Skill Based Learning

Block & Textual Coding

Artificial Intelligence

Robotics & Electronics

Autonomous Self Driving Cars

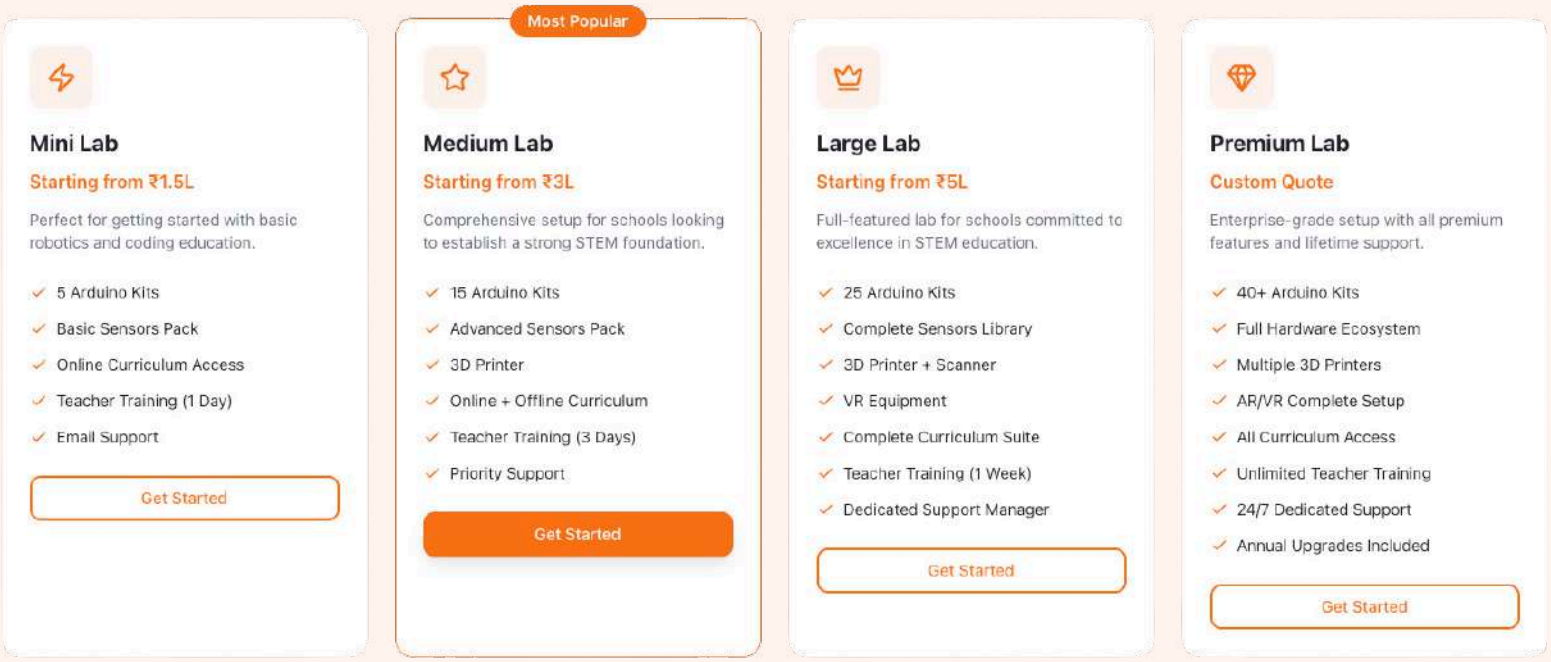

Interactive Learning With 3D, AR, VR & XR

Advanced Robotics & Automations

Robotics Lab Packages

Choose the perfect package that fits your school's needs and budget. All packages include setup and training.

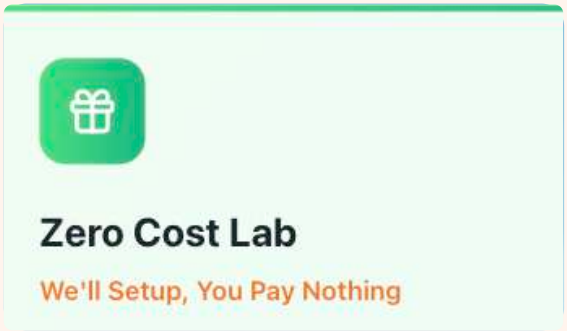

Extra Packages

Special options for schools with unique needs or limited budgets.

- Complete Lab Setup
- Teacher Trainer Included
- Curriculum Access
- Earn part of profit

- Flexible Configuration
- Custom Hardware Selection
- Personalized Curriculum
- Dedicated Consultation

Upgrade Education with Future Skills

We provide different types of Lab setup services tailored for every school's needs.

AI & Robotics Lab

- Block & Textual Coding
- AI/ML
- Robotics & Tinkering
- 3d printing & Drones
- DIY & 21st Century Skills

SCIENCE & Computer Lab

- Computer Fundamentals
- Physics, Chemistry, Bio, Maths Models
- AI/ML Activities
- Robotics Kits

Astronomy Lab

- Block & Textual Coding
- Robotics & Tinkering
- Astronomy Models & Telescopes
- AI/ML

ATL Lab

- 3d printing
- IoT Devices & Drones
- Robotics kits
- Electronics Tools

STEM Lab

- Computer Fundamentals
- Game Design
- AI/ML Activities
- Hands-On Robotics

AR & VR Lab

- Block & Textual Coding
- AI/ML
- Robotics & Tinkering
- VR Headset & 3D Printing

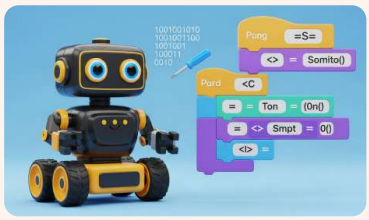

CBSE/ICSE/State Boards Aligned Curriculum

Duet Power provides a complete one-stop-shop curriculum for classes 1-12 divided into 4 stages, aligned with CBSE, ICSE, State Boards and NEP 2020 guidelines.

Pre-Primary (kg - 2)

- Basics of Computer
- Creative Drawaing
- Foundational Literacy
- Intro to AI & Robotics

Primary (Class 3 - 5)

- Computer Fundamentals
- Game Design
- AI/ML Activities
- Hands-On Robotics

Middle (Class 6 -9)

- Block & Textual Coding
- AI/ML
- Robotics & Tinkering
- Computational Thinking

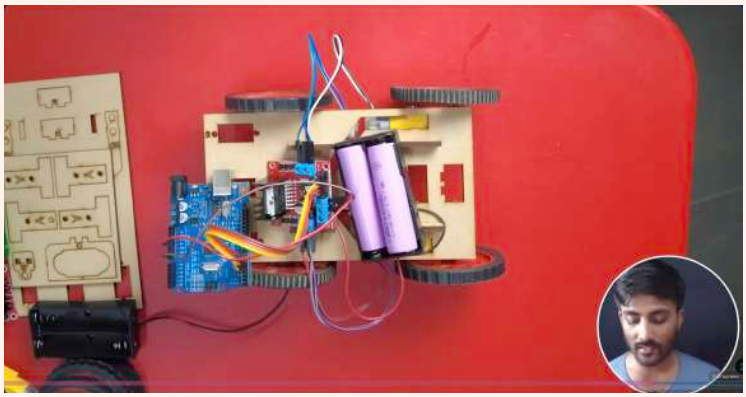

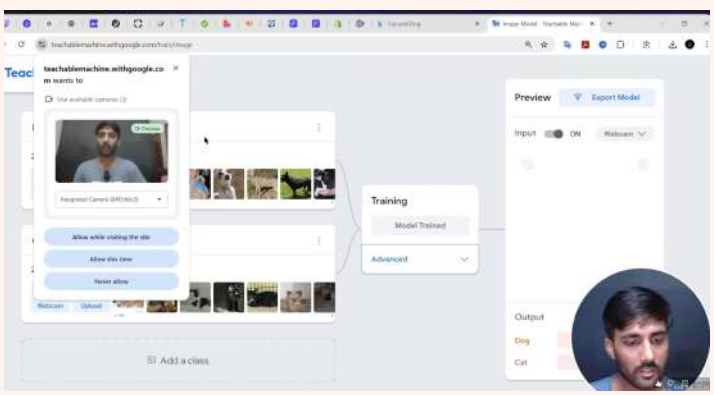

Secondary (Class 9 - 12)

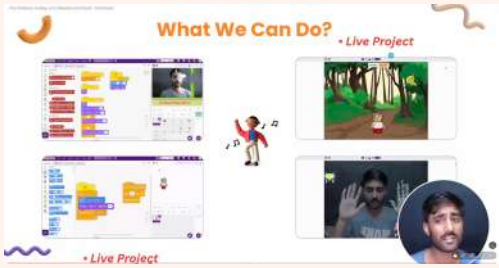

- Advanced Coding, AI/ML
- Robotics with Python
- NLP & CV
- Data Science

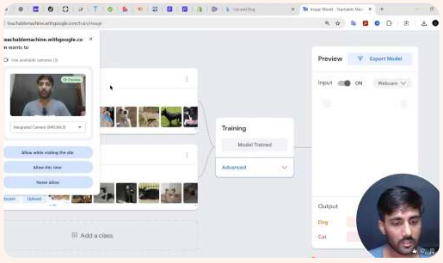

Students & Teachers Upskilling Program

Turn code into confidence with Duet Power. Our immersive teacher training bridges the gap between theory and reality, offering deep-dives into Python, AI/ML, and Robotics. We don't just show you the tools; we hand you the controls, ensuring you are ready to lead a 21st-century classroom from day one.

Offline Students & Teachers Training

Online Training & Support Sessions

Skill-Based Hands-on Learning

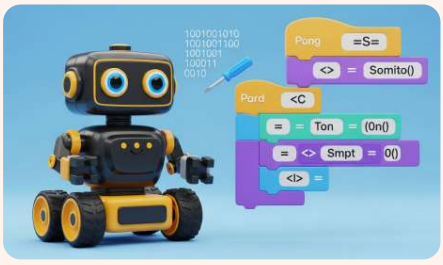

Key Features of Training

- Workshops on Latest Technologies
- Hands-on Learning and Skill Development

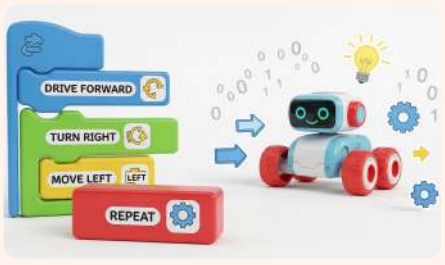

Value for Educators

- Professional Certification of Training.
- Networking with Educators Globally

Teacher Training Outcoes

- Access to Structured Teaching Resources
- Access to Structured Teaching Resources

Get Best Learning Experience

Access Interactive Learning & Teaching Resources

Join Community of Educators & Innovators

Hands-on Offline training on Coding, AI & Robotics

Get Certified & Showcase your achievements

A One-Stop-Solution

DuetSTEM is an innovative tech-education ecosystem that is highly recommended by teachers and embraced by students for classroom learning. Designed for kids aged 7-18, our tailored solutions provide educators and students with the tools to cultivate coding and problem-solving skills, enabling them to engineer their future.

Structured Curriculum

Comprehensive curriculum for classes 1-12 aligned with CBSE, ICSE, State Boards & NEP 2020.

Hands-on Learning

DIY projects with Arduino kits, sensors, robotics components for practical skill development.

Digital Resources

Online interactive platforms with video tutorials, PDF guides, and challenge cards.

Certification

Industry-recognized certifications for both students and teachers upon completion.

Teacher Training

Professional development programs to equip educators with the latest teaching methodologies.

Infrastructure

Complete power and networking setup optimized for high-performance equipment.

Painting

Vibrant, educational wall art and branding designed to create an inspiring space for STEM.

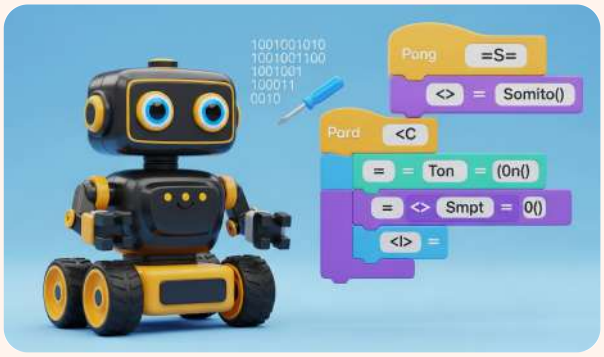

Furniture

Durable, modular workstations tailored for heavy-duty, hands-on robotics projects.

Coding, AI & Robotics Kit

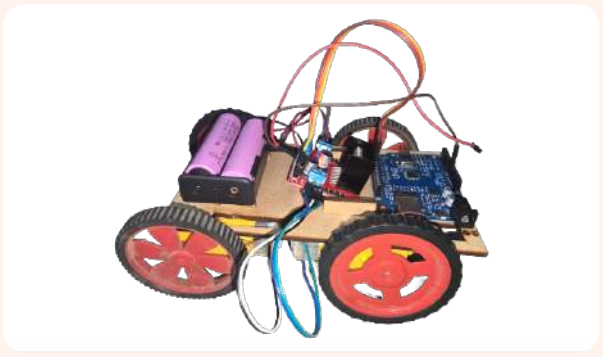

The Duet Arduino Ultimate Kit is a comprehensive learning companion that makes learning new technologies like electronics, artificial intelligence, and robotics engaging and fun. Unlike closed ecosystems, this kit utilizes the globally standard Arduino platform, ensuring students learn real-world engineering skills.

One Infinite Kit Limitless Creations

Build hundreds of real-world projects like obstacle-avoiding robots, radar systems, weather stations, and home automation

Learn Industry-Standard Concepts

Helps you understand widely used concepts such as Circuit Design, Embedded Systems, and IoT (Internet of Things)

DIY Plug and Play Kits

Connect sensors and motors easily via breadboards and jumper wires, removing the need for complex soldering

Programmable with Multiple Languages

Program your robots with Block-Coding or Arduino IDE (C/C++) or Python.

Software Ecosystem

We utilize a powerful stack of globally recognized software tools to ensure students are "Future Ready." Our ecosystem combines hardware control with cutting-edge AI tools.

Exploring Cutting-Edge Technologies

Hardware

- Arduino
- Quarky
- Raspberry Pi
- Sensors
- Actuators
- Circuit Components
- Microcontrollers
- Development Boards

Software

- Tinkercad
- Arduino IDE
- PictoBlox
- Scratch
- Python IDE
- Machine Learning Tools
- CAD Software
- Circuit Simulation

Learning Resources

- PDF Guides
- Video Tutorials
- Interactive Lessons
- Project Examples
- Challenge Cards
- Reference Materials
- Online Documentation

Tools & Equipment

- 3D Printers
- Soldering Kits
- Testing Equipment
- Safety Gear
- Assembly Tools
- Project Kits
- Workshop Materials

DUET POWER

TO A BETTER FUTURE

Duet Power is a multidisciplinary implementation-driven organization working at the intersection of technology, infrastructure, sustainability, and education. We focus on creating scalable, inclusive, and sustainable learning models rather than one-time setups.

With extensive experience across government projects, CSR initiatives, NGOs, and private institutions, Duet Power brings strong execution capability and contextual understanding of on-ground realities. We empower students from Grades 3 to 12 with future-ready skills through hands-on, project-based learning using our specialized "Duet Learning Framework."

Address: Duet STEM, A-84, 2nd Floor, Sector -65 ,Noida **Contact:** +91 9650006373

Something We Captured :)
